

## *Associate Director – Environmental Economist*

### **Flexible UK - London preferred**

Entec is a major environmental and engineering consultancy with over 900 staff and associates across a national network of 14 offices. Increasingly our work has become more economics led, as our corporate clients are facing decisions which will have economic and financial implications for their business and the communities within which they operate. This is an excellent opportunity to play a leading role within Entec's Environmental Policy Team, developing and directing client projects in the public sector (European Commission, DEFRA, BERR, Environment Agency and others) and supporting corporate clients in their strategic response to climate change and significant regulatory developments.

Educated to degree level (or equivalent) in Economics or a relevant environmental subject, you will have a good understanding of the role of economics in the development of legislation and regulation; and the implications of these for corporate strategy and decision-making. You will have experience in economic valuation of both market and non-market goods; economic analysis such as cost benefit and multi-criteria analysis; market-based instruments and assessing impacts on competition and competitiveness. Experience in econometric modelling and knowledge of some of the key current policies such as the EU Emissions Trading Scheme, the Water Framework Directive, or REACH, would be of particular value.

Further details of this and other vacancies are available on our website [www.entecuk.com](http://www.entecuk.com). Applications can be made on-line or by contacting the Recruitment team directly at [recruit@entecuk.co.uk](mailto:recruit@entecuk.co.uk) or (0191) 272 6386.
